

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Aus dem Vorwort zu der Vorarbeit für die Laterculi, dem Conträr-Index zu den Papyri:

(Gradenwitz Einführung in die Papyruskunde, pag. IX).

Verlag von S. Hirzel in Leipzig.

Da es sich hier um ein neues mechanisches Hilfsmittel zur Ergänzung lückenhafter Texte handelt, so sei über die Entstehungsgeschichte kurz berichtet.

UBeM. 388 ist zum Teil der geschichtlichen Erklärung der Thatsache gewidmet, dass für einen Menschen Namens *Εὐκαίρος* zwei Freilassungsbriefe mit verschiedenem Datum und verschiedenen Urkundszeugen, aber gleichem Aussteller (einem später ermordeten Soldaten *Σεμπρόνιος*) vorgebracht werden. 338^{II}, 36: *Πόστουμος* *εἶπεν*· “*Ἐ, ὡς λέγεις, διπλαῖ ἐγράφη[σα]ν, πῶς οὔτε ὁ αὐτὸς χρόνος ἐν αὐταῖς πρόσκειται ἀλλ’ οὐδὲ οἱ αὐτοὶ σφραγιστά*”; *Κασιανὸς* *εἶπεν*· “*Ὡς προειπόν σοι, ἡ Πτολεμαῖς, ὑφέ[λο]μένη τὴν ταῖς αλ[...].αῖς τοῦ Εὐκαίρου ταβέλ[λ]αν. ἡ Αὐξωνος τοῦ τετελευτηκότος ἐνέγραψε τὸ τούτου ὄνομα, ἐν ἣ πλαστογραφία περιμ[έ]νον ἐστὶν τὸ ὄνομα [νῦ]ν περὶ ὅλην τὴν ταβέλλαν*.”

Das *προειπεῖν* fand offenbar 338^I, 29ff: *Κασιανὸς* *εἶπεν* statt; indess ist diese Stelle so lückenhaft erhalten, dass sie zwar zu der im folgenden zu gebenden Deutung der oben abgedruckten Stelle wohl stimmt, aber zur Erklärung selbst nicht verwertbar ist. In unserer Stelle kommt alles auf die Ausfüllung der Lücke *αλ[...].αῖς* an: *Πτολεμαῖς* hat eine an sich noch sichtbare nachträgliche Fälschung in der namentlichen Bezeichnung des Freizulassenden vorgenommen; aber welche? *ταῖς ἄλ[λ]αῖς τ[αῖς]*, was Krebs zweifelnd vorschlägt, giebt zwar Worte, aber keinen Zusammenhang. Da sich die Lösung nicht finden wollte, sah ich in Papes Wörterbuch alle Lemmata, die mit *αλ* anfangen, durch, fand bei *ἀλήθεια*, dass auch *ταῖς ἀληθείαις* statt *τῇ ἀληθείᾳ* vorkommt, und glaubte in *ὑφελομένη τὴν ταῖς ἀλ[ηθε]αῖς τοῦ Εὐκαίρου ταβέλ[λ]αν τ[ῇ] Αὐξωνος τοῦ τετελευτηκότος ἐνέγραψε τὸ τούτου ὄνομα* die richtige Lesung gefunden zu haben; in der Form modifizierend, in der Sache be-

stätigend wirkt jetzt UBeM. 742^{II}, 1: *ἵνα σοι μεταδῶμεν, εἰ ταῖς ἀληθ[ι]ναῖς ἀντὶ φερνῆς ἢ παραχώρησις ἐγένετο*, insofern *ταῖς ἀλ[ηθιν]αῖς*, wie statt *ταῖς ἀλ[ηθεί]αις* natürlich ebensogut in 388 zu ergänzen, durch sie für den Sprachgebrauch der Papyri gesichert wird.

Ptolemaïs hat danach die echte Urkunde des Eukairos hinter sich behalten, und ihm diejenige eines Verstorbenen nach gefälschtem Namen eingehändigt. Der Zweck des wunderlichen Manövers wäre, den Eukairos mit einem von ihm wohl für echt genommenen Falsum zu bedenken, um bei Gelegenheit, etwa nach Ablauf einiger Zeit, ihn ebensowohl, unter Aufdeckung des Unechten, als Sklaven reklamieren, wie, unter Angebot der echten Urkunde, ein Lösegeld von ihm erpressen zu können. Nun ist es klar, dass, wenn nicht erhalten wäre: *ταῖς αλ . . . αῖς του*, sondern *ταῖς . . . ιναῖς του*, die eben vorgeführte Methode der Ergänzung unanwendbar wäre: denn, um den Anfang herauszubekommen, müsste man alle Worte mit *ινος*, und alle mit *ινα*, *ινη* beisammen haben, und das leisten die Wörterbücher nicht.

So beschloß ich, ein Verzeichnis der fehlenden Art herstellen zu lassen; es lag auf der Hand, dass etwa auf *ινος* allein abzustellen willkürlich wäre, und ebensowohl alle Worte auf *νος*, ja alle auf *ος* gesammelt werden mussten. Herr Prof. Diels, mit dem ich den Plan besprach, billigte meine Absicht, die lateinische, nicht die griechische Sprache zunächst heranzuziehen, und machte die einleuchtende Bemerkung, dass alle Endungen mit einem Schlage getroffen würden, wenn die Worte atomistisch in der alphabetischen Reihenfolge des letzten Buchstabens nacheinander stünden. Ein solches Verzeichnis sämtlicher lateinischen Worte lasse ich denn auch herstellen, und hoffe es bald gedruckt vorzulegen. . . .

Über den Conträr-Index zu den Papyri heisst es weiter: Die Papyri enthalten nur einen Teil des griechischen Wortschatzes, und aus diesem Teil haben die Verfasser des Indices wiederum eine Auslese aufgenommen. Gleichwohl ist eine gewisse Wahrscheinlichkeit dafür vorhanden, dass das lückenhaft erhaltene Wort auch an anderer Stelle der Papyri vorkommt und in den Indices steht: deshalb ist auch dieses unvollkommene Hilfsmittel von Wert: so führt UBeM. 592^I, 6: *ἡ ἀντίδοχος . . .* (s) *ἐκείν[ω]ν . . . χιαν η[γ]αγεν* die Untersuchung aller Wörter mit *χια* auf *ἡδ[ω]ν-χίαν*, so UBeM. 619^I, 1 *τῆ[ς] . . . ισθεῖσαν πρόσοδον* auf *δ[ι]σθεῖσαν* (Worte auf *ισω*), was ich allerdings dann auch in den Ergänzungen fand, so findet sich für UBeM. 613, 6: *ὅς τὰ χειρμένα . . . ι . . . ασι: ἐξβι-*

βάσι als das wahrscheinlichste, so empfiehlt sich Brit. Mus. II, 220, ¹⁴ ἐξουσίαν τοῦ πωλεῖν ὑποτίθεσθαι οὐδὲ ἄλλως[.....] τισαὶ ein χορημα]τισταί; so würden Grenfell und Hunt schwerlich deutschen Gelehrten die Lösung und Lesung von ὑπὸ διαγνηλιον haben überlassen müssen, wenn ein Conträr-Index ihnen unter den Worten auf ιος auch ἥλιος vor Augen geführt hätte u. s. f. — Auch abgesehen von dem unmittelbaren Nutzen, der natürlich nicht in jedem Fall stattfindet, stärkt die Durchsicht der Worte mit bestimmter Endung das Gedächtnis für künftige Fälle.

Allerdings wird der Konjekturealkritiker, der sich seines 'Trefferblicks' bewusst ist, diesem Hilfsmittel gegenüber Empfindungen hegen, wie der kräftige Alpensteiger beim Anblick der Gornergratbahn; aber auch ihn wird hoffentlich die Erwägung besänftigen, dass eine solche Wortparade, ausser für Ergänzungen, auch für grammatikalische Studien ihren Wert hat.

Praemonenda I

Huius libri conficiendi cur ceperim consilium alio loco (Gradenwitz, *Einführung in die Papyruskunde* pagina X) dixi. Ibidem relatum Hermannō Diels id deberi, quod voces a tergo non secundum syllabas sed secundum litteras disposui.

Operi initium fuit annus 1898 quo ex Georgesii Wölfflinii Pauckeri copiis voces singulae in schedas redactae sunt: cui rei operam dederunt stud. phil. Wiemer (qui tamquam praeerat operi) et alii studiosi theol. iur. phil. Tum voces a fronte ordinatae prelo sunt traditae curante Dr. phil. Lehnert. His confectis iamque a tergo schedis ordinatis altera pars operis per quattuor annos typographos exercebat: id eo factum est quod Dr. Lehnert ad Thesaurum linguae Latinae evocato in eius locum primo stud. (iam Dr. phil.) Bruno A. Müller successit deinde post varios casus Dr. Lommatzsch quorum illi vocabula a tergo ordinanda, hic plagulas examinandas suscepit.

Per totum autem opus Augustus Brinkmann tantam partem laboris sibi imposuit, ut quae bene administrata sunt in his indicibus, eorum partem permagnam illi deberi quin grato animo confitear facere non possim.

Otto Gradenwitz.

Praemonenda II

Pro fundamento usi sumus Georgesii vocabulario septimum edito a. 1879, nisi quod errores aliquot apertissimos correximus et plane inutilia abieciimus, ita tamen ut etiam perdubia retineremus quae quamvis superflua nocere non viderentur. Quo fit ut nec formae singulares vel memorabiles prorsus evitatae sint nec vocum minus mobilium ubique extet nominativus singularis vel praesentis prima persona, sed ubi Georgesio placuit etiam apud nos vel pluralis vel tertia persona inveniatur, exceptis glossematicis: velut si quis nomina in -a, -io, -or exeuntia omnia colligere volet, ei etiam -ae, -iones, -ores perlustranda erunt. Eandem ob causam Graecae originis nomina partim sub os, -on, partim sub -us, -um locum habent.

Georgesii copias supplevimus ex Pauckeri variis collectaneis eisque quae in Wölfflinii Archivio inveniuntur lexicis addenda. Quae a Georgesio absunt asterisco (*) notavimus.

In posteriore operis parte brevitatis studio adducti eiusdem vocis duplices formae ubi vel nulla alia voce vel perpaucis interpositis altera alteram secuturae erant (velut *sapphiratus miratus sappiratus*), uberio-rem dedimus priore loco, litteris quae alteri formae desunt, uncis quadratis inclusis (*sapp[h]iratus miratus*).

Terminationes ambiguas -o, -or, -us quia evidens utilitas poscere videbatur ita distinximus ut verba numeris coniugationum additis a substantivis et adverbiiis dirimeremus, a secundae declinationis substantivis et adiectivis tertiae et quartae substantiva numeris, adverbia ut flexione carentia adiuncto °signo separaremus.

Vocum quasi memorias delineare nostrum non duximus. Neque enim huic operi id propositum erat ut scientia vocum Latinarum au-geretur, sed ut ex eis quae praesto erant pararetur instrumentum utile vel necessarium iis qui grammaticis et criticis studiis litteras aucturi sunt; id speramus Thesauro linguae Latinae ad finem perducto exstiturum nobis Hommeliis Lenelium.

Otto Gradenwitz. Augustus Brinkmann.
